Free Resource of the Day

Matt Ridley on The Rational Optimist

Put yourself in an optimistic mindset about the future of our species and the world, with the facts presented by author Matt Ridley from his book *The Rational Optimist*. Matt Ridley applies ideas about evolution to the sort of sharing of ideas and technologies that occur in contemporary society, and feels that this trading of information and goods has led to a cumulative benefit for almost everyone. He then goes down the list of predicted catastrophes like population growth and climate change, and he attempts to debunk the evidence that these issues spell doom for humanity. Learn to think rationally positive about our future with author Matt Ridley.

Note: this coupon only works with credit cards and not PayPal. This coupon is valid for this title through next week until Monday, November 5th.

George Friedman has become a leading expert in geopolitical forecasting, sought after for his unmatched grasp of both historical and contemporary trends. In The Next 100 Years, Friedman turns his eye to the future. Drawing on a profound understanding of geopolitical patterns dating back to the Roman Empire, he shows that we are now, for the first time in half a millennium, experiencing the dawn of a new historical cycle.

Friedman predicts that the U.S.-Jihadist war will conclude, to be replaced by a second confrontation with Russia; China will undergo a major internal crisis, and Mexico will emerge as an important world power; there will be at least one global war, but armies will be smaller and wars less deadly; and technology will focus on space, both for military uses and for energy. This book is a compelling, eye-opening portrait of the future.

Available on MP3 Audio Download.

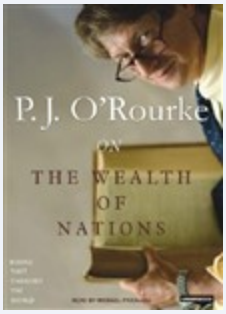
Books That Changed the World



We've added a new series of audio books entitled "Books That Changed the World". This series features "biographies" of some of the most influential books in history. These nine books you've probably heard of, but you may not have had a chance to read them in their entirety. The series features nine of today's great writers and historians providing an in-depth looks at these works and the ways in which they have shaped our world. Here are the nine books in the series:

On the Wealth of Nations by P.J. O'Rourke

The Qur'an: A Biography by Bruce Lawrence

Darwin's Origin of Species: A Biography by Janet Browne

Plato's Republic by Simon Blackburn

Clausewitz's on War by Hew Strachan

Thomas Paine's Rights of Man by Christopher Hitchens

The Bible: A Biography by Karen Armstrong

Marx's Das Kapital by Francis Wheen

Homer's the Iliad and the Odyssey: A Biography by Alberto Manguel

Dive deeper into some of the great books in history!
